

# My Research Document

Iago Pinal-Fernandez

2024-10-20

## Introduction

This document discusses various experiments and their results. We will refer to several figures and tables throughout the text.

In Experiment 1, we can see the results in Figures 1-4 and Figure 2. Also, here we illustrate an important finding (Figures 1, 3-4).

The analysis is summarized in Table 1 and detailed further in Table 2.

Supplementary details can be found in Supplementary Figure 1 and Supplementary Table 1.

In addition to the figures and tables, further reading can be found in references Pinal-Fernandez et al. (2024), and Selva-O’Callaghan et al. (2018). These references discuss the theoretical background and related work in this field.

## Results

The results show a significant improvement when comparing different methods. Figure 1 and Figure 2 highlight the trends observed.

Moreover, Table 1 and Table 2 provide comprehensive data supporting these findings.

## Discussion

We observed that the results align with previous studies (Pinal-Fernandez et al. 2023), which found similar trends. The supplementary materials (see Supplementary Figure 1 and Supplementary Table 1) provide additional insights into the methodology.

## Conclusion

The Figure-Table-Formatter greatly enhances the clarity of our document by streamlining citation management for figures, tables, and references. We recommend using it for future documents to maintain a consistent style.
